I am a highly skilled DevOps and Software Engineer. My passion is automation where I deliver great results. I helped many organizations to save lots of hours of manual work by introducing CI/CD pipelines and automating Cloud operations. I write code in Go, Python, PHP, JavaScript. I contribute to Open Source projects and speak at conferences.

Languages and technologies

GCP • Azure • AWS • Linux • Kubernetes • Rancher • Istio • Docker • Ansible • SaltStack • Terraform
Concourse CI • CircleCI • Jenkins • Spinnaker • Argo CD • Prometheus • Grafana • Splunk • Bash • Git • Jira
Python • Golang • JavaScript • TypeScript • PHP • MySQL • PostgreSQL • MongoDB • Elasticsearch •
Apache • Nginx • Drupal • WordPress

Skills

Application and cloud architecture • DevOps • CI/CD • Software engineering
Web development • Rapid prototyping • Security analysis • Performance tuning
Accessibility • Documentation • Scrum • Agile

Experience

Jan 2023 - Present	**Senior DevOps Engineer @ Georgetown University** Developed Tenable - Jira integration, a vulnerability reporting system, using Python and Docker. Worked on the Cloud Inventory and Audit project to collect information about Cloud resources as well as perform audits on availability and security. Managed cloud infrastructure and configuration using Terraform and Saltstack.

June 2019 – Nov 2022	**Principal Web App Developer / DevOps Engineer @ Howard Hughes Medical Institute** Developed Kubernetes platform for institutional Drupal websites running in Azure and on-premises. Automated CI/CD pipelines. Developed Varnish front-end monitoring and broadcasting functionality for kube-httpcache project using Go language. Maintained existing web codebases.
Feb 2019 – May 2019	**Principal Software Developer @ Crumpton Group** Prototyped an innovative security intelligence system using Go, Elasticsearch, and Siren Investigate. Set up security sensors and update pipelines for software running in security sensors.
Apr 2014 – Feb 2019	**Senior Drupal Developer @ Georgetown University** Developed Drupal Multisite Tool (Druml), an Open-Source project to manage a large number of Drupal websites. Automated deployment pipelines for multiple WordPress websites using Go language. Maintained Java based Python based applications. Developed new functionality for Drupal and WordPress websites.
Oct 2013 – Mar 2014	**Team Lead @ Blink Reaction International** Led two teams of Drupal developers to work on the 911 Memorial project and Pfizer CTI.
Aug 2010 – Apr 2013	**Lead Developer, Operations Lead in Eastern Europe @ Trellon, LLC** Worked on the Drupal websites for Center for Climate and Energy Solutions, Earth Day Network, National Institutes of Health, Cornell University, Jean Goodall Institute. Formed a local team of web-developers. Contributed to the Open Source Drupal community.

Jul 2009 – Jul 2010	**Assistant @ Donetsk National Technical University, Dept. of Computer Systems for Monitoring** Worked in the engineering team for the Air Quality Monitoring system for the Donetsk region. Authored and taught web design and web development courses. Maintained classroom workstations. Set up a Linux server.
Aug 2005 – Jul 2010	**Web Developer @ Freelance** Worked as a web developer for clients across the globe including Design Industries, Alaska Tech Support, Pagema, Algo-rithm.

Education

Sep 2003 – Jun 2007	**Donetsk National Technical University, Ukraine** Bachelor of Computer Engineering.
Sep 2007 – Dec 2008	**Donetsk National Technical University, Ukraine** Master of Computer Engineering.

Certifications

Associate Cloud Engineer (Google Cloud) valid till November 2026.
